Data Engineering Capstone Project

Overview

The purpose of the data engineering capstone project is to give you a chance to combine what you've learned throughout the program. This project will be an important part of your portfolio that will help you achieve your data engineering-related career goals. In this project, you can choose to complete the project provided for you, or define the scope and data for a project of your own design. Either way, you'll be expected to go through the same steps outlined below.

Instructions

To help guide your project, we've broken it down into a series of steps. Detailed steps are included in the project instructions page.

- Step 1: Scope the Project and Gather Data
- Step 2: Explore and Assess the Data
- Step 3: Define the Data Model
- Step 4: Run ETL to Model the Data
- Step 5: Complete Project Write Up

And make sure to review your own project using the [Project Rubric](#).
